

Rare Earth Demand for Phosphors to 2025

INSIGHTFUL CHARTS, TABLES, ANALYSIS, AND FORECASTS

98 Page Digital Chartbook

Management-Style Format

Data-Rich Charts, Tables, and Analysis

Insightful Forecasts for All Major End-Uses

Demand by Region, Oxide, Application, and Individual End-Use in 5 Primary Categories:

1. General Lighting

- Fluorescent lamps, LED lamps, and more

2. Backlighting

- Televisions, computer monitors, and more

3. Outdoor Lighting

- Street lights, parking lot lights, and more

4. Automotive Lighting

- Head lights, tail lights, and more

5. X-Ray Intensifying Screens

- Medical, dental, and other applications

Our transparent and dynamic demand forecasts include an overview of estimated REE usage per unit for each individual application covered, and specify how this usage per unit will evolve over the forecast period.

This ensures that the reader comes away with a solid understanding of both the micro and macro demand drivers shaping the demand outlook for each application.

In this chartbook, we forecast global REO demand for applications of phosphors from 2017 through 2025. We cover global demand by region, oxide, application, and end-use in the categories general lighting, backlighting, outdoor lighting, automotive lighting, and x-ray intensifying screens.

This Chartbook has been prepared in a 'Management-Style' format that enables the user to quickly digest and make sense of key technology and market trends shaping the future of global rare earth demand.

The information and forecasts presented herein build on the wealth of research and information presented in Adamas Intelligence's comprehensive "Rare Earth Market Outlook to 2025" report.

Essential reading for:

- Phosphor Producers
- Lamp Manufacturers
- Consumer Electronics Manufacturers
- Phosphor Buyers and End-Users
- Informed Investors and Financiers
- Exploration and Mining Companies
- Government Agencies
- Other Industry Stakeholders
