

# Rare Earth Market Outlook to 2025

COMPREHENSIVE INDUSTRY REVIEW AND MARKET OUTLOOK

## 825 Page Digital Report

### Global Supply, Demand, Prices, and Policy

### Covers Period from 2005 through 2025

#### Report Highlights:

##### 1. Comprehensive Industry Review

- Mineral occurrences, exploration projects, processing capacity, policy, pricing, supply, demand, illegal mining, and much more

##### 2. Detailed Breakdown of Global Production

- Overview of production by individual REO from all major production regions globally
- Detailed breakdown of legal and illegal production by mining area within China

##### 3. Granular Breakdown of Global Demand

- Rare earth demand for hundreds of individual end-uses and applications
- Review trends affecting rare earth usage over time for each end-use and application

##### 4. Three Forecast Scenarios

- Three rare earth supply-demand-price forecast scenarios explored in detail
- Scenarios that consider the implications of new mines being developed and the impact of illegal rare earth production in China

##### 5. Hundreds of Tables and Charts

- Hundreds of tables and charts providing a transparent overview of supply, demand, and prices from 2005 through 2025

In this report, we analyze the rare earth market from 2005 through 2015, estimating production, consumption, prices, and the value of regional and global markets in each year.

We provide a breakdown of REO consumption per end-use for over 200 individual end-uses and applications and reveal insightful trends about the trajectory of the rare earth market.

With valuable hindsight in tow, we forecast supply, demand, prices, and the value of regional and global markets for each year from 2016 through 2025.

We provide a detailed breakdown of forecasted REO demand per unit and per annum for over 200 individual end-uses and applications and analyze three distinct future scenarios to forecast REO prices under different supply and demand conditions.

#### Essential reading for:

- Informed Investors
- Project Financiers
- Equity Analysts
- Rare Earth Buyers and End-Users
- Exploration and Mining Companies
- Rare Earth Processing Companies
- Government Agencies
- Other Industry Stakeholders
