

EV Battery Lithium Monthly Report

MONTHLY REPORT AND DATA SERVICE

Monthly Digital Report and Data

Tracking EV Battery Lithium Consumption By Country, Cell Supplier, Cell Chemistry, OEM

Monthly Report Highlights:

1. Lithium Consumption by Country

- Monthly review of lithium consumption by region and country
- Analysis of top 10 countries in each region
- Over 100 countries covered

2. Lithium Consumption by Cell Supplier

- Monthly review of lithium consumption by cell supplier
- Analysis of top 10 suppliers in each region

3. Lithium Consumption by Cell Chemistry

- Monthly review of lithium consumption by cell chemistry
- Analysis of top 10 chemistries in each region
- LFP, NCA, NCM 5-, 6-, 7-, 8-Series, etc.

4. Lithium Consumption by EV Maker

- Monthly review of lithium consumption by EV maker
- Analysis of top 10 EV makers in each region

5. Sales-Weighted Averages (SWA)

- SWA Li consumption per EV per region
- SWA Li consumption per EV per cell supplier
- SWA Li consumption per EV per cell chem
- SWA Li consumption per EV per EV maker
- SWA Li consumption per EV type per region
- Everything updated monthly

The 'EV Battery Lithium Monthly' is a subscription-based report for tracking global monthly consumption of lithium (in tonnes) by country, EV maker, EV model, cell supplier and cell chemistry and EV type on an ongoing basis.

The 'EV Battery Lithium Monthly' is an essential service for automakers, cell suppliers, battery materials manufacturers, miners, explorers, investors, and other stakeholders with a professional interest in the EV, battery or battery materials industries.

Spend less time collecting, analyzing, and fact-checking data, and more time making informed decisions.

Essential tool for:

- Automakers
- Motor Manufacturers
- Power Electronics Suppliers
- Magnet & Metals Producers
- Exploration & Mining Companies
- Informed Investors and Financiers
- Government Agencies
- Industry Stakeholders
